**DETAILED ACTION**

***Election/Restrictions***

Applicant's election with traverse of claims 1-23 in the reply filed on September 7, 2004 is acknowledged. The traversal is on the ground(s) that the two inventions are closely related and there is no undue burden on the examiner. This is not found persuasive because the two groups recite different structures for solving the same problem, and although they are grouped in the same class and subclass, the search for the two groups would be significantly different and therefore place an undue burden on the examiner.

The requirement is still deemed proper and is therefore made FINAL.

Upon further examination it has been realized that a further restriction of the claimed subject matter is required.

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I, having a second supporting unit which comprises an anchoring ring and a washer, as in Figures 3-5.

Species II, having a second supporting unit which comprises a cap provided at the end of the feed roller shaft, as in Figures 6-10.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-4, 16-17, 21 and 23 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Thomas Jones on November 10, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made:

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

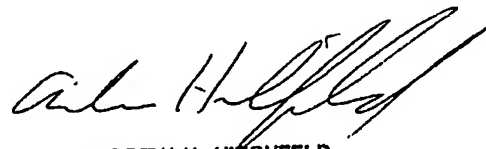

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jill E. Culler whose telephone number is (571) 272-2159. The examiner can normally be reached on M-Th 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrew Hirshfeld can be reached on (571) 272-2168. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
